

OF-1 Soccer World Cup in South Africa betting game Win the iPad WI-FI, 32 GB!

Newsflash

Dear OF-1 Community - or better in this case: Dear World Cup Community :)

In a few days the best soccer teams of the world will fight for the World Cup in South Africa. And you can also fight - IAP offers the great OF-1 Soccer World Cup in South Africa betting game, where you can try to beat the other players.

You like soccer and have a vision which team will win this World Cup. So place your bets, virtually visit in 3D the wonderful stadiums in South Africa and invite you colleagues to compare with you - if you have enough trust in your skills ;)

[Register now at our demo and play!](#)

And win the [Apple iPad WI-FI, 32GB!](#)

Term and conditions of the OF-1 Soccer World Cup in South Africa betting game [can be found here](#).

Resources

Here are few resources from our websites

[OF-1 main site](#): Find out what OF-1 is and how this reliable, high-performance and UI-independent "Full Lifecycle Development Environment" for OpenEdge can help you to enter the SaaS market, migrate from other outdated frameworks like ADMx and create great UIs with a Wow factor with the .NET UI. And all this with coding only in ABL!

[OF-1 online demo](#): Explore AJAX and Java, SaaS and Cloud Computing, superior fast development and zero deployment, Mash-Ups and much more in our online demo. Enter your name, company and email and you will receive your login account in a few seconds.

[Tools For Progress](#): **PCase** is a Progress focused Case-Tool, which integrates perfectly into the OpenEdge Architect and enables you to document and design your databases. It is expandable and can be used to create source code, e.g. for ProDataSets. **Viper** is a tool to interactively design and print reports. You can create PDFs on the fly out of your reports. **Skin-Client** is a tool to integrate UIs like AJAX or Java into your application and to handle triggers from these UIs in the ABL.

best regards
Your OF-1 / Tools4Progress team
