

Dear OF-1 Community,

we are excited to bring you news about OF-1.

OF-1 as reliable, high-performance and UI-independent "Full Lifecycle Development Environment" for OpenEdge is the fastest way to develop complex, full featured applications. *SaaS over the web is only a small step with OF-1!*

Announcements / Activities

To keep you up-to-date, here are our latest news items to OF-1.

OF-1 Group in LinkedIn

[Chris Swingler](#) has created an [OF-1 group in LinkedIn](#). This group is for customers and prospective customers of the OF-1 framework for Progress OpenEdge from IAP Hamburg. It will promote discussion on all aspects of use of the framework.

Please register in this group to take place in that discussions.

Upcoming workshops in Paris and Helsinki

In June IAP will hold a commercial workshops with several prospects in Helsinki (Finland) together with our partner [Veli-Matti Korhonen](#) and in Paris (France) with our partner [Chris Swingler](#).

New worldwide Text Message (SMS) Online Demo

Our [Online Demo](#) contains a sample of the integration of an external worldwide text message service. You will find it in the section "Mash-Ups" labeled "Text Message (SMS)". To check it out you can send yourself a message using that service on behalf of the service provider [Media Info Transfer](#).

Text messaging allows a lot of interesting interactions with your prospects and customers, like mobile marketing (newsletter, customer attraction, customer loyalty), receive and send in any way, text message (SMS) to mail, microbilling, voting, datamining, lotteries.

Last Activities: Finland PUG Conferenc and SaaS Solutions in the OpenEdge World in The Netherlands

Both, the [FinPUG](#) meeting in Tallinn, capital of Estonia (with our partner [Veli-Matti Korhonen](#)) and the roadshow 'SaaS Solutions in the OpenEdge World' in the Netherlands (with our partner [George van Veen](#)) were quite successful - they led to the upcoming workshop in Finland and sales in the Netherlands.

Feature outlook for OF-1 release 1.5

Here a short outlook to some of the key features of the next major version (1.5) of OF-1 which will be released in August.

- **Configurable Desktop:** Position and visibility of any element of the Desktop could be configured.
- **Ribbon Controls (.NET):** Use this well known control from Microsoft Office.
- **Complex Calender Object:** Integrate your own calendar easy.
- **Subscreens:** These screens allow Eclipse like positioning of screens inside and out of the main window, in a tab or direct. They can be combined with any 'data source' or any 'data sink'. This allows much more flexible and user defined applications.
- **Business Graphic Objects (Charts):** Do what your boss likes - show the key values in a nice way.
- A lot of minor fixes and improvement!

Resources

Here are few resources from our websites

[OF-1 main site](#): Find out what OF-1 is and how this reliable, high-performance and UI-independent "Full Lifecycle Development Environment" for OpenEdge can help you to enter the SaaS market, migrate from other outdated frameworks like ADMx and create great UIs with a Wow factor with the .NET UI. And all this with coding only in ABL!

[OF-1 online demo](#): Explore AJAX and Java, SaaS and Cloud Computing, superior fast development and zero deployment, Mash-Ups and much more in our online demo. Enter your name, company and email and you will receive your login account in a few seconds.

[Tools For Progress](#): **PCase** is a Progress focused Case-Tool, which integrates perfectly into the OpenEdge Architect and enables you to document and design your databases. It is expandable and can be used to create source code, e.g. for ProDataSets. **Viper** is a tool to interactively design and print reports. You can create PDFs on the fly out of your reports. **Skin-Client** is a tool to integrate UIs like AJAX or Java into your application and to handle triggers from these UIs in the ABL.

best regards

Your OF-1 / Tools4Progress team
